

César García

Calgary, AB | Open work permit to June 2028, no sponsorship required | (403) 370 4030 | cesarolandogr@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineering graduate (University of Calgary, June 2026) with production experience in C# and .NET, and an academic year spent building automated validation pipelines that benchmarked software output against clinical-grade reference hardware. Experience across the SDLC: requirements with non-technical stakeholders, development, release validation, defect resolution, and CI/CD quality gates. Bilingual in English and Spanish

TECHNICAL SKILLS

Languages: C#, Java, Python, SQL (T-SQL), JavaScript/TypeScript, Bash, C/C++, HTML/CSS
Databases & Data: Microsoft SQL Server (T-SQL, SSMS), PostgreSQL, MySQL, DynamoDB, relational data modeling, data migration
Frameworks & Web: ASP.NET MVC, .NET Blazor, Spring Boot, React, Node.js, Flask, FastAPI, REST APIs
Testing & Quality: unit and integration testing, automated validation pipelines, regression testing, QA documentation, AI-assisted code review
DevOps: Git/GitHub (branching, pull requests, configuration management), GitHub Actions, CI/CD, Docker, AWS
AI: Anthropic Claude API, OpenAI API, prompt engineering, NumPy, Pandas, scikit-learn, OpenCV

EXPERIENCE

Canadian Sport Institute Alberta Calgary, AB
Software Engineer, Capstone (Data Pipelines & Validation) Sept 2025 - April 2026

- Built end-to-end Python data pipelines processing drone-captured video into biomechanical metrics, achieving 85% correlation with clinical-grade motion capture hardware
- Designed automated evaluation pipelines computing per-joint RMSE, MAE, and Pearson r against ground-truth references, including cross-correlation-based temporal alignment and fuzzy column matching
- Implemented custom signal processing (zero-phase Butterworth and median filtering) on joint angle time-series to extract sagittal-plane kinematics from raw pose estimation output

Grupo Roble La Libertad, El Salvador
Software Engineer Intern May 2025 - August 2025

- Designed and delivered a production ASP.NET MVC web portal in C#, used by 5+ regional teams and increasing reporting efficiency by 40%
- Built the portal front end in .NET Blazor, developing reusable interactive components wired to C# server-side logic following object-oriented design principles
- Modeled and queried a centralized Microsoft SQL Server database (T-SQL), supporting real-time reporting across international operations
- Validated functionality across releases and resolved defects reported by business users, working directly with non-technical stakeholders to clarify requirements
- Led source control workflows using GitHub branching, pull requests, and code reviews

TBox San Salvador, El Salvador
Software Engineer Intern May 2024 - August 2024

- Trained and supported 200+ students and educators on interactive educational modules built with JavaScript and CSS, gathering user feedback to improve adoption
- Improved deployment stability across 8 application modules through rigorous testing and QA documentation

PROJECTS

Chipy – Full-Stack Career Simulation Web App | TypeScript, React, Fastify, DynamoDB, AWS, Terraform, Docker, CI/CD
• Deployed a live, serverless full-stack app on AWS: S3 + CloudFront for the SPA, Lambda Function URL for the API, DynamoDB on-demand, all provisioned via Terraform and deployed through GitHub Actions OIDC, at ~\$0 idle cost
• Designed one zod-validated request/response contract shared by client and server to reject malformed input, with rate limiting and liveness/readiness endpoints on the API
• Enforced quality with a GitHub Actions pipeline

AI-Automated Portfolio Pipeline | TypeScript, GitHub Actions, Claude API, Greptile
• Built an autonomous development pipeline where natural **language GitHub issues** trigger LLM-generated code via the Anthropic API
• Implemented automated **PR creation**, AI code review gates using Greptile, and **zero-touch deployment** through Vercel
• Engineered XML-based structured output parsing and repository context injection to produce accurate, convention-aware code changes

EDUCATION & CERTIFICATIONS

University of Calgary Calgary, AB
Bachelor of Science in Software Engineering Graduation: June 2026
AWS Certified Solutions Architect – Associate | Amazon Web Services
